## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to apparatus.

Group II, claim(s) 15-18, drawn to method.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the apparatus requires the special technical feature a total length of the electrode is substantially equal to an excitation wavelength; however, the method requires a total length of the electrode is a natural number times of a half of an excitation wavelength.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 - Embodiment 1, pages 11-22, Figs. 1,2, including a single electrode having a bent back portion with a curved shape and two straight portions to be substantially parallel;

Species 2 - Embodiment 2, pages 22-26, Fig. 3, including a plurality of U-shaped electrodes arranged in a single plane parallel to a film deposition surface of a large single rectangular substrate;

Species 3 - Embodiment 3, pages 26-28, Figs. 4,5, including a plurality of layered electrodes provided in a stratified configuration at predetermined intervals from each other, that is, the electrode arrays are arranged in planes parallel to each other;

Species 4 - Embodiment 4, pages 29-30, Fig. 7, including a plurality of layered electrodes provided in a stratified configuration at predetermined intervals from each other, that is, the electrode arrays are arranged in planes parallel to each other; and further including a substrate conveying mechanism 42 provided with a substrate support mechanism 41.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-3, 5, 6, 11, 12 and 14 belong to species 1;  
Claims 8, 9 and 13 belong to species 2;  
Claims 4, 7 and 10 belong to species 3; and  
Claims NONE belongs to species 4.

The following claim(s) are generic: claim 1, 5 and 11 are generic to species 1; and claim 8 is generic to species 2.

Art Unit: 1763

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: cited above.

A telephone call was made to Jerry Thielman on 11/1/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
